

NOTE:
Fabric shall be placed on Roadway side of posts. For certain curves, stream crossings or other locations specifically directed by the Engineer, fabric may be placed on the Property side of posts.

TYPICAL PLAN OF FENCE

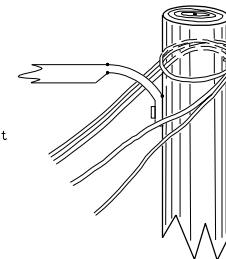

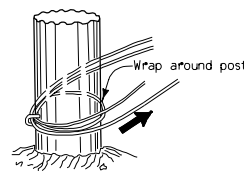

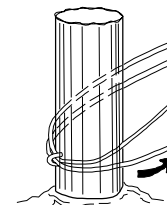

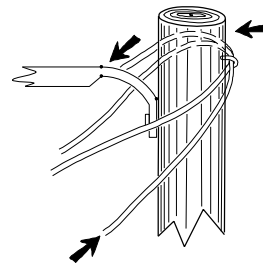

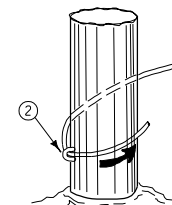

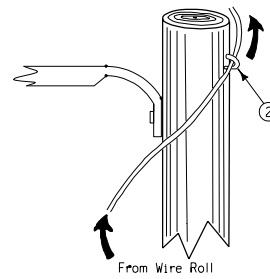

TYPE 39 FENCE

TYPE 47 FENCE

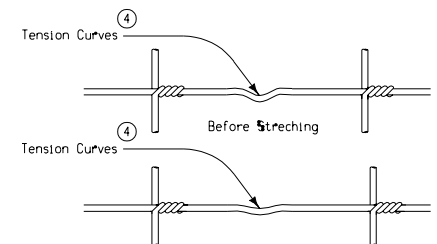

END POST WIRE WRAP

DETAILS OF BRACE WIRE INSTALLATION

NOTES:

- 1 Make a minimum of four tight wraps back around itself. Ends of the wrap to be trimmed flush.
- 2 Set staples cross-wise to the grain. Staples are to be driven tight at pull posts. All other wood post the staples shall be driven firm, but loose enough to allow lateral movement of the wire.
- 3 Approved fence fabric wire splice.
- 4 A tension curve consists of a "U" shaped crimp in the fence wires. It has the same effect as a spring. Stretch to 50% removal of the factory crimp.

STRETCHING DETAILS

All dimensions given in millimeters unless noted.
